

# Brake Upgrade Kit Specifications

Model: VB – VP Commodore  
Part no: PK10 - 11

The combination of all the benefits listed below lead to a significant reduction in stopping distance.

| Features                      | Original Specification       | Performance Specification         | Benefits   |
|-------------------------------|------------------------------|-----------------------------------|--|
| Larger front rotors           | Ø271 x 22 vented             | Ø328 x 28 vented                  | Increased brake response<br>Improved thermal performance |
| Larger rear rotors            | Ø279 x 10.7 solid            | Ø280 x 20 Vented                  | Increased brake response<br>Improved thermal performance |
| Slotted rotors front and rear | No slots                     | Multiple straight slots per rotor | Increased pad bite<br>Reduced brake fade                 |
| Larger front disc pads        | Pad area 43.4cm <sup>2</sup> | Pad area 57.6cm <sup>2</sup>      | Improved thermal performance                             |
| Performance friction material | Passenger car formulation    | Performance rated formulation     | Increased pad bite<br>Reduced brake fade                 |
| Larger front calipers         | Single piston caliper        | Twin piston caliper               | Increased brake response<br>Reduced pedal travel         |
| Performance brake hoses       | Rubber brake hoses           | Steel braided brake hoses         | Increased brake response<br>Reduced pedal travel         |
| Improved caliper finish       | As cast                      | High gloss Flame coating          | More aggressive appearance                               |
